

# TYPE III WILDLAND

## TYPE III WILDLAND

Wildland and urban interface apparatus must be as rugged as the terrain you're covering, that's why we designed the E-ONE Type III to be a versatile, durable member of your crew.

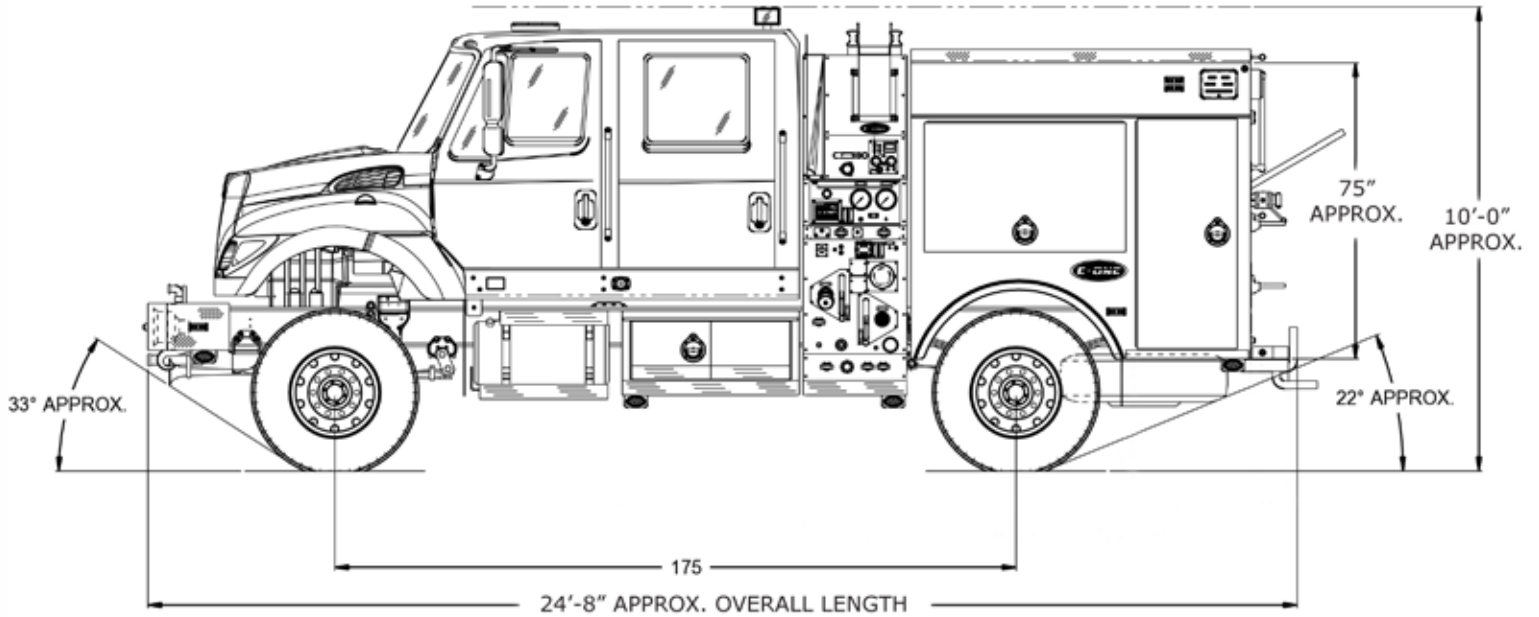

The integral tank design allows the E-ONE Type III to offer a 175" wheel base, a 10' overall height and a hose-bed positioned 75" from the ground.

The separate pump module is designed for plumbing flexibility with the ability to house single or two-stage fire pumps up to 1000 GPM. An optional diesel auxiliary pump is available for pump and roll operations. Stainless steel plumbing, Class A foam system, and a booster reel are standard equipment on the E-ONE Type III Wildland.

When lives are in the balance and seconds count

# TYPE III WILDLAND
